

Ayush Kashyap

Senior Software Engineer / Tech Lead · Healthtech

Dehradun, India · ayushkashyaptx@gmail.com · linkedin.com/in/ayushk01 · github.com/ayushk01 · ayushk01.github.io

SUMMARY

Senior full-stack engineer and de-facto tech lead (~4 years) who built and operates a multi-tenant, white-label **EHR / healthcare-SaaS** platform end-to-end — a principal contributor to the core (~a quarter of the codebase) — serving **2,000+ clinics and hundreds of thousands of patients across 100+ specialties**. Depth in **FHIR/HL7 interoperability, multi-tenant SaaS at scale, and clinical AI**. Leads the engineering team; owns frontend, backend, mobile, and cloud.

EXPERIENCE

Software Development Engineer II / Tech Lead — Healthtech SaaS company

Mar 2022 – Present · Remote

Multi-tenant, white-label EHR / healthcare-SaaS. Manages the engineering team; owns the full stack.

Joined as Software Engineer Intern (Mar 2022 – Mar 2023); full-time SDE-I from 2023, promoted to SDE-II / Tech Lead.

- **Principal contributor to the core EHR platform** (~a quarter of the codebase over 4 years); lead the engineering team.
- Architected a **multi-tenant EHR** (per-tenant isolation, per-org modules + branding) serving **2,000+ active clinics, thousands of doctors, and hundreds of thousands of patients across 100+ specialties** — processing tens of thousands of appointments/month; plus a white-label layer of dozens of custom-branded deployments.
- Built **FHIR R4 / HL7 interoperability** for India's National Digital Health Mission (NDHM/ABDM) — compliant document bundles, validation, and terminology.
- Built an in-house **clinical AI & speech stack** (Python): an AI medical scribe, speech-model fine-tuning, and speech-to-text for ambient clinical documentation.
- Shipped **React Native** clinician and patient apps to the App Store and Play Store (Hermes, native modules, Fastlane CI, OTA updates).
- Engineered real-time systems (Socket.io) and background-job processing (Redis); owned schema and API design on Node/Express + MySQL.
- Drove platform-level initiatives as tech lead: engineering-estate consolidation, a deployment pipeline, a cloud cost-optimization initiative, document/PDF-engine optimization, and a major React Native version migration.

SELECTED PROJECTS

- **Letsdrive / Letsride** — ride-sharing & rental platform built end-to-end (Flutter, GetX, Node, Prisma, PostgreSQL, AWS).
- **Verbatim** — AI feedback-intelligence demo (React, serverless, LLM-backed); click-to-verify traceability.
- **WoodVer Reward** — loyalty-rewards Android app (Flutter/Dart/Firebase); 500+ installs.

SKILLS

Languages	TypeScript, JavaScript, Python, Dart
Frontend	React, Redux, React Native (Hermes, Fastlane, CodePush/OTA), Tailwind
Backend	Node.js, Express, REST, Socket.io, Redis/Kue, JWT/OAuth
Data	MySQL, Sequelize, PostgreSQL, Prisma, Redis
Architecture	Multi-tenant SaaS, white-label platform design, FHIR R4 / HL7 (NDHM/ABDM), system design
Cloud	AWS (S3, EC2, CloudWatch)

EDUCATION

B.Tech, Computer Science — Graphic Era Hill University, Dehradun

2019 – 2023 · GPA 8.5

AWARDS

Engineering excellence award, employer (2023) · Certificate of Outstanding Achievement, Graphic Era University (2023) · College Hackathon Finalist (2020)
